Minimum quantities may apply.

STRETCH

Built into our **Gro-Guard UV** specs is a unique stretch. This allows our products to stretch in the cross direction to help prevent tearing easily.

GG-40

**MEDIUM
 WEIGHT
 FROST PROTECTION**
 40 gsm / 1.2 oz. Sq. yd.

*Offers 5-8° F protection
 Intermediate weight
 Porous to air and water; transmits 60% light
 Added freeze protection

HIGH UV CONTENT

All **Gro-Guard UV** products have the highest level of UV protection to promote reuse. Our competitors use a much less amount of UV content which results in replacing covers more often.

GG-51

**HEAVY WEIGHT
 FROST PROTECTION**
 51 gsm / 1.5 oz. Sq. yd.

*Offers 7° F+ protection
 Porous to air and water; transmits 50% light
 Strong and durable for repeated use
 Heavier freeze protection

ULTRASONIC LAMINATION

All **Gro-Guard UV** covers **GG-34** and heavier are sonically layered to create the desired material weight. This adds strength and softness compared to ALL other covers on the market.

GG-60

**HEAVY WEIGHT
 FROST PROTECTION**
 60 gsm / 1.8 oz. Sq. yd.

*Offers 8° F+ protection
 Porous to air and water; transmits 40% light
 Maximum strength and durability
 Maximum freeze protection

CONSISTENCY = QUALITY

Gro-Guard UV covers are made to our specs by the **same** manufacturers every year. This allows us unparalleled quality.

GG-68

**HEAVY WEIGHT
 FROST PROTECTION**
 68 gsm / 2.0 oz. Sq. yd.

*Offers 9° F+ protection
 Porous to air and water; transmits 30% light
 Maximum strength and durability
 Maximum freeze protection
